

mobile productivity

fraxion spend management drives productivity on-the-go

Give your employees the tools and freedom to work from anywhere, without losing financial control. Access Fraxion using any mobile device and an Internet connection; pre-configured company policies will guide decision making and improve spending behaviour.

Capture expenses and supporting documents, request, approve and analyse on the road. The days of overflowing in-trays, process bottlenecks and out of office excuses are over; Fraxion empowers your employees to get more done in less time.

work smarter

From email notifications to smart phone expense tracking, to off-site approvals; Fraxion drives efficiency through mobile technology.

Capture transaction data in real-time: Reduce the risk of losing mandatory documentation by uploading photos of receipts, this saves time, promotes accuracy and supports audit trail requirements.

Automated, mobile expense management in Fraxion means employees can buy, claim, request leave and submit travel requests from their mobile devices. Managers can immediately approve or reject requests based on real-time information and budgetary data.

Fraxion's mobile access, escalating approval structures and high user adoption mean that all spend requests are approved before costs are incurred.
